

Bayesian demographic account for New Zealand

Bayesian Demography Ltd

10 December 2021

1 Data

Figure 1: Census data

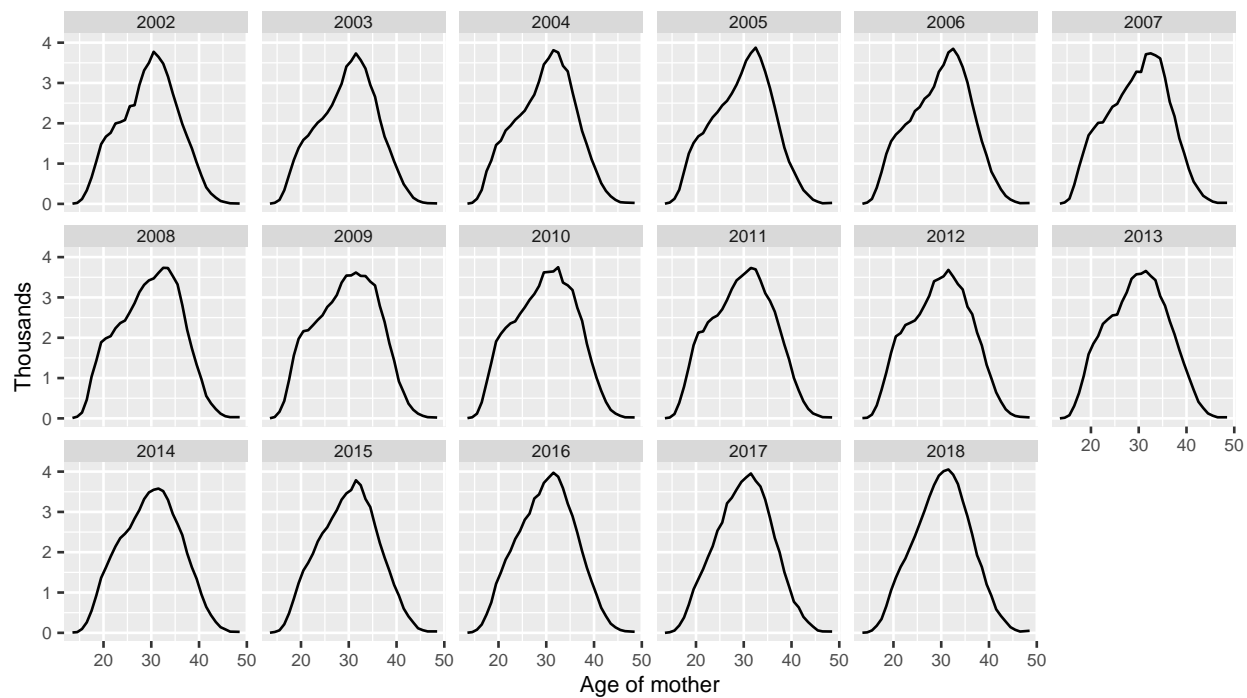

Figure 2: Registered births by age

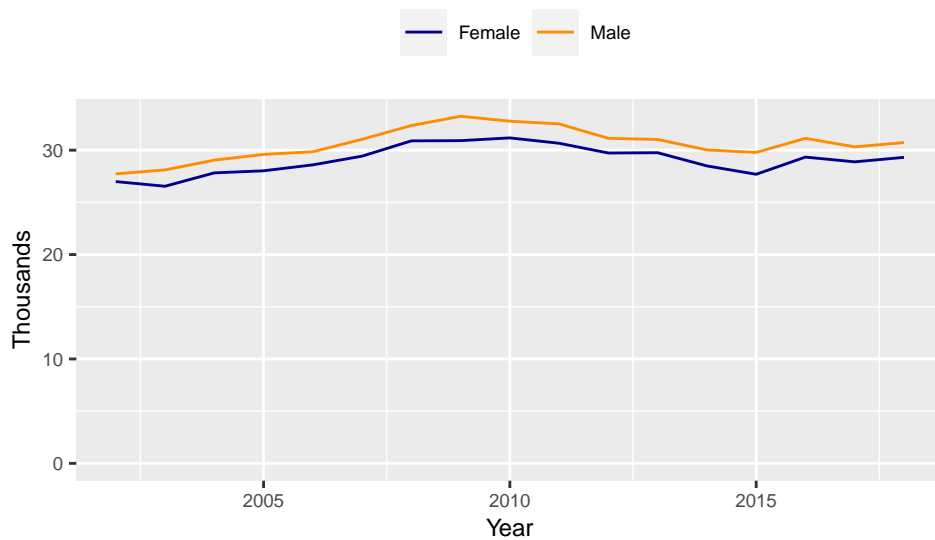

Figure 3: Registered births by sex

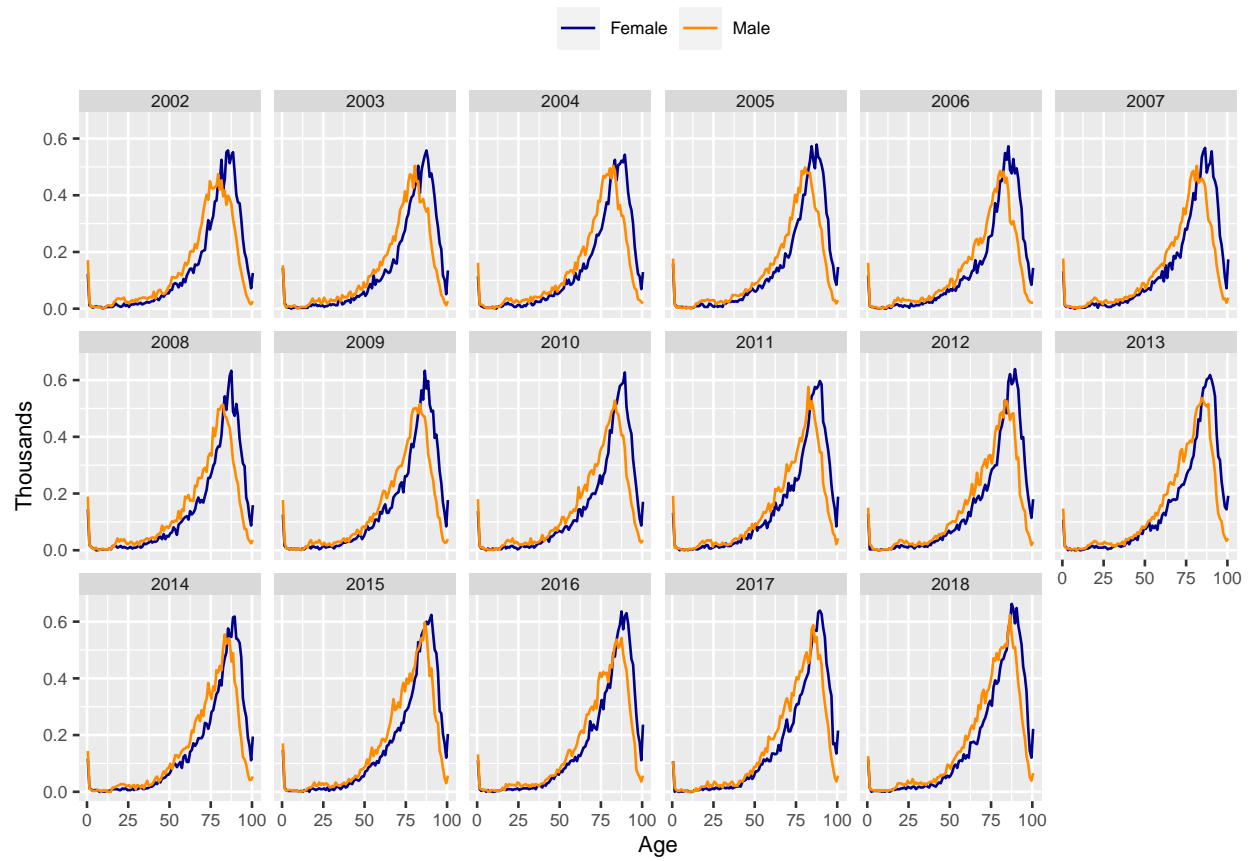

Figure 4: Registered deaths

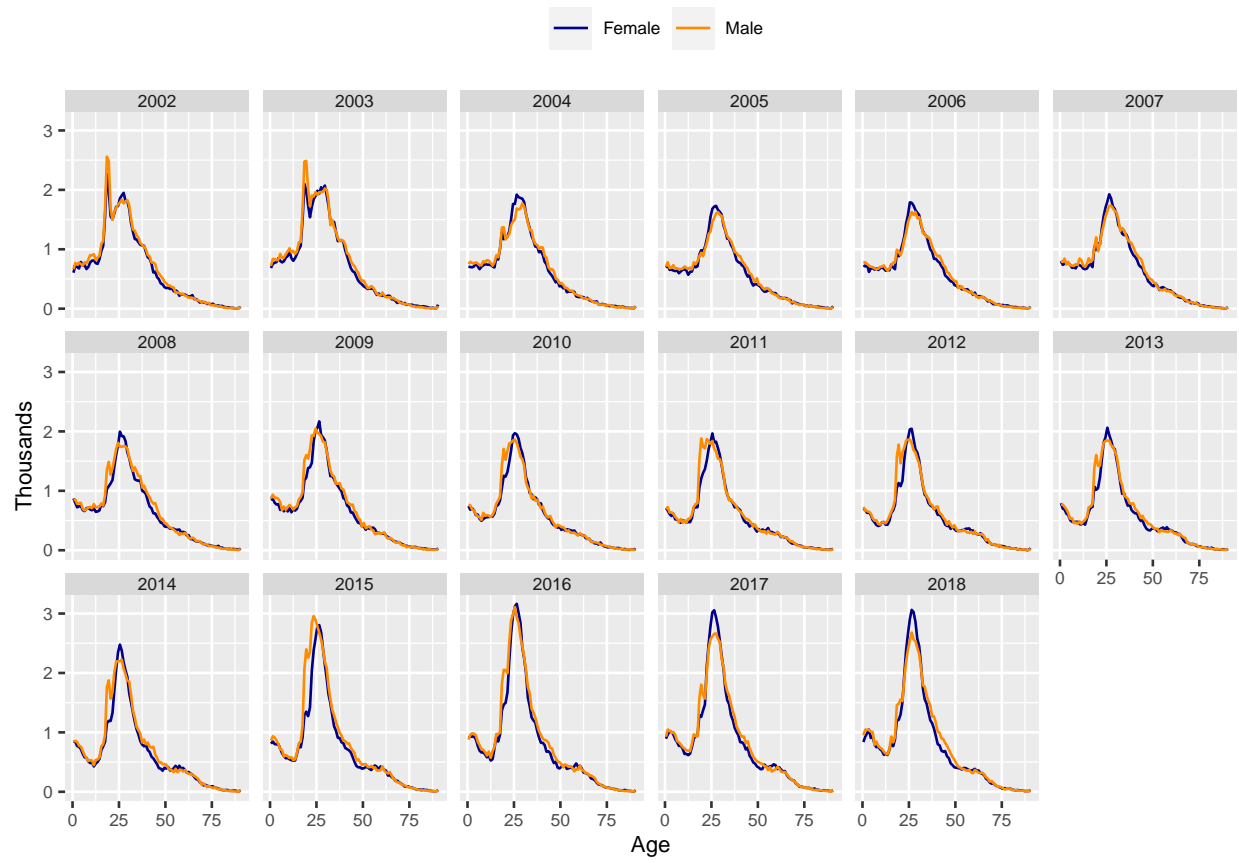

Figure 5: International arrivals

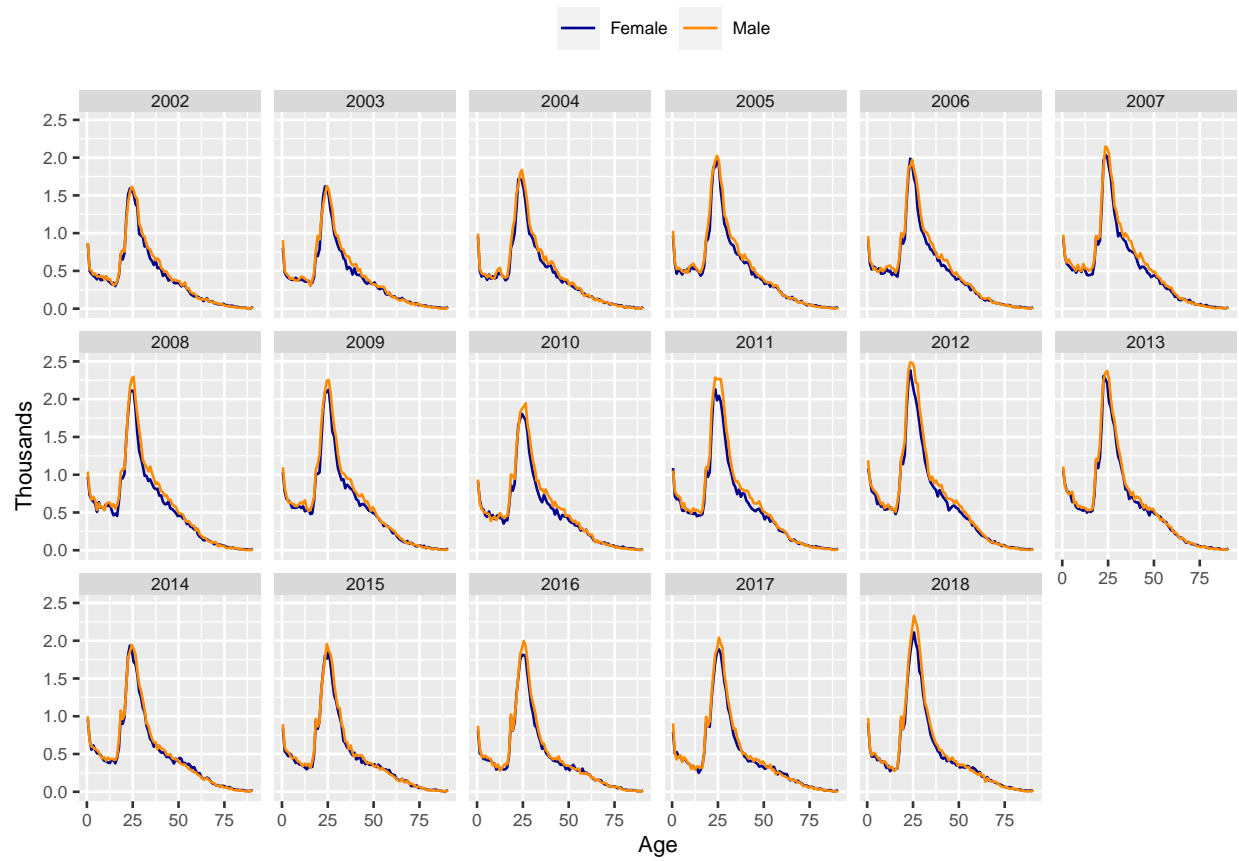

Figure 6: International departures

2 Estimates

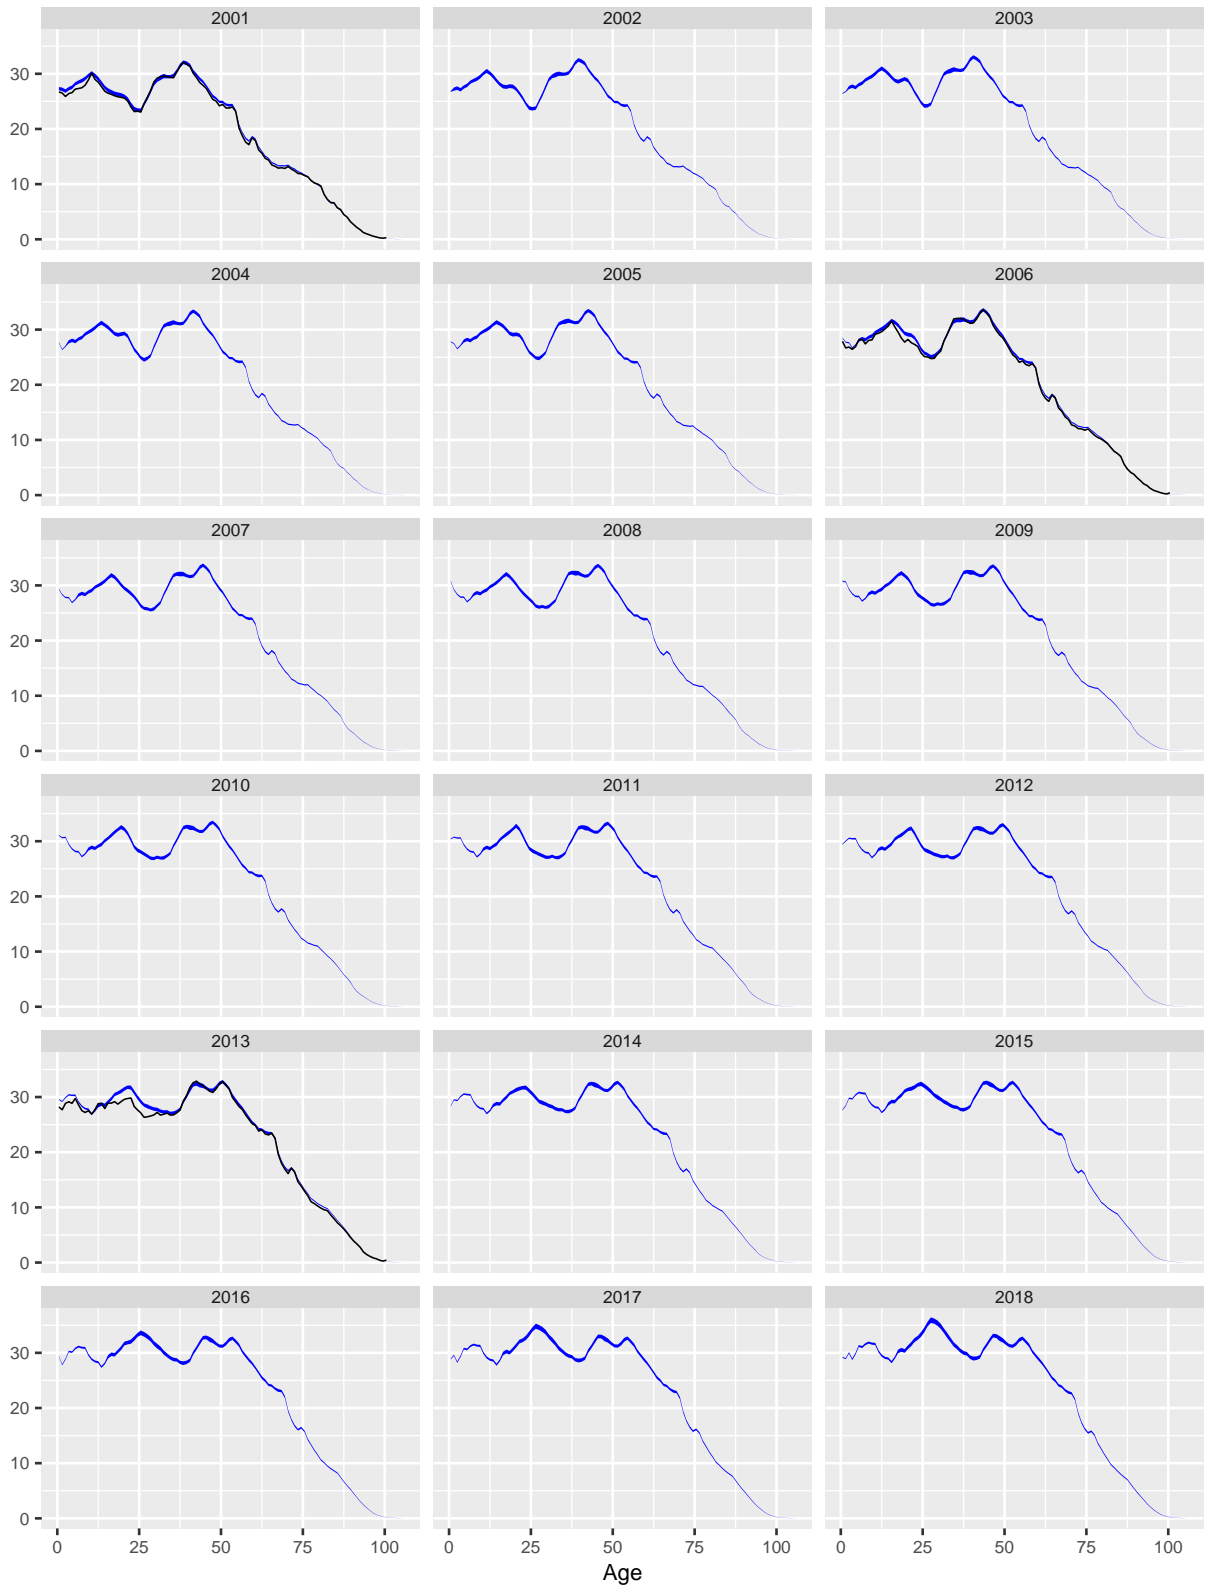

Figure 7: Population - female. Blue bands denote 95% credible intervals. Black lines denote unadjusted census counts.

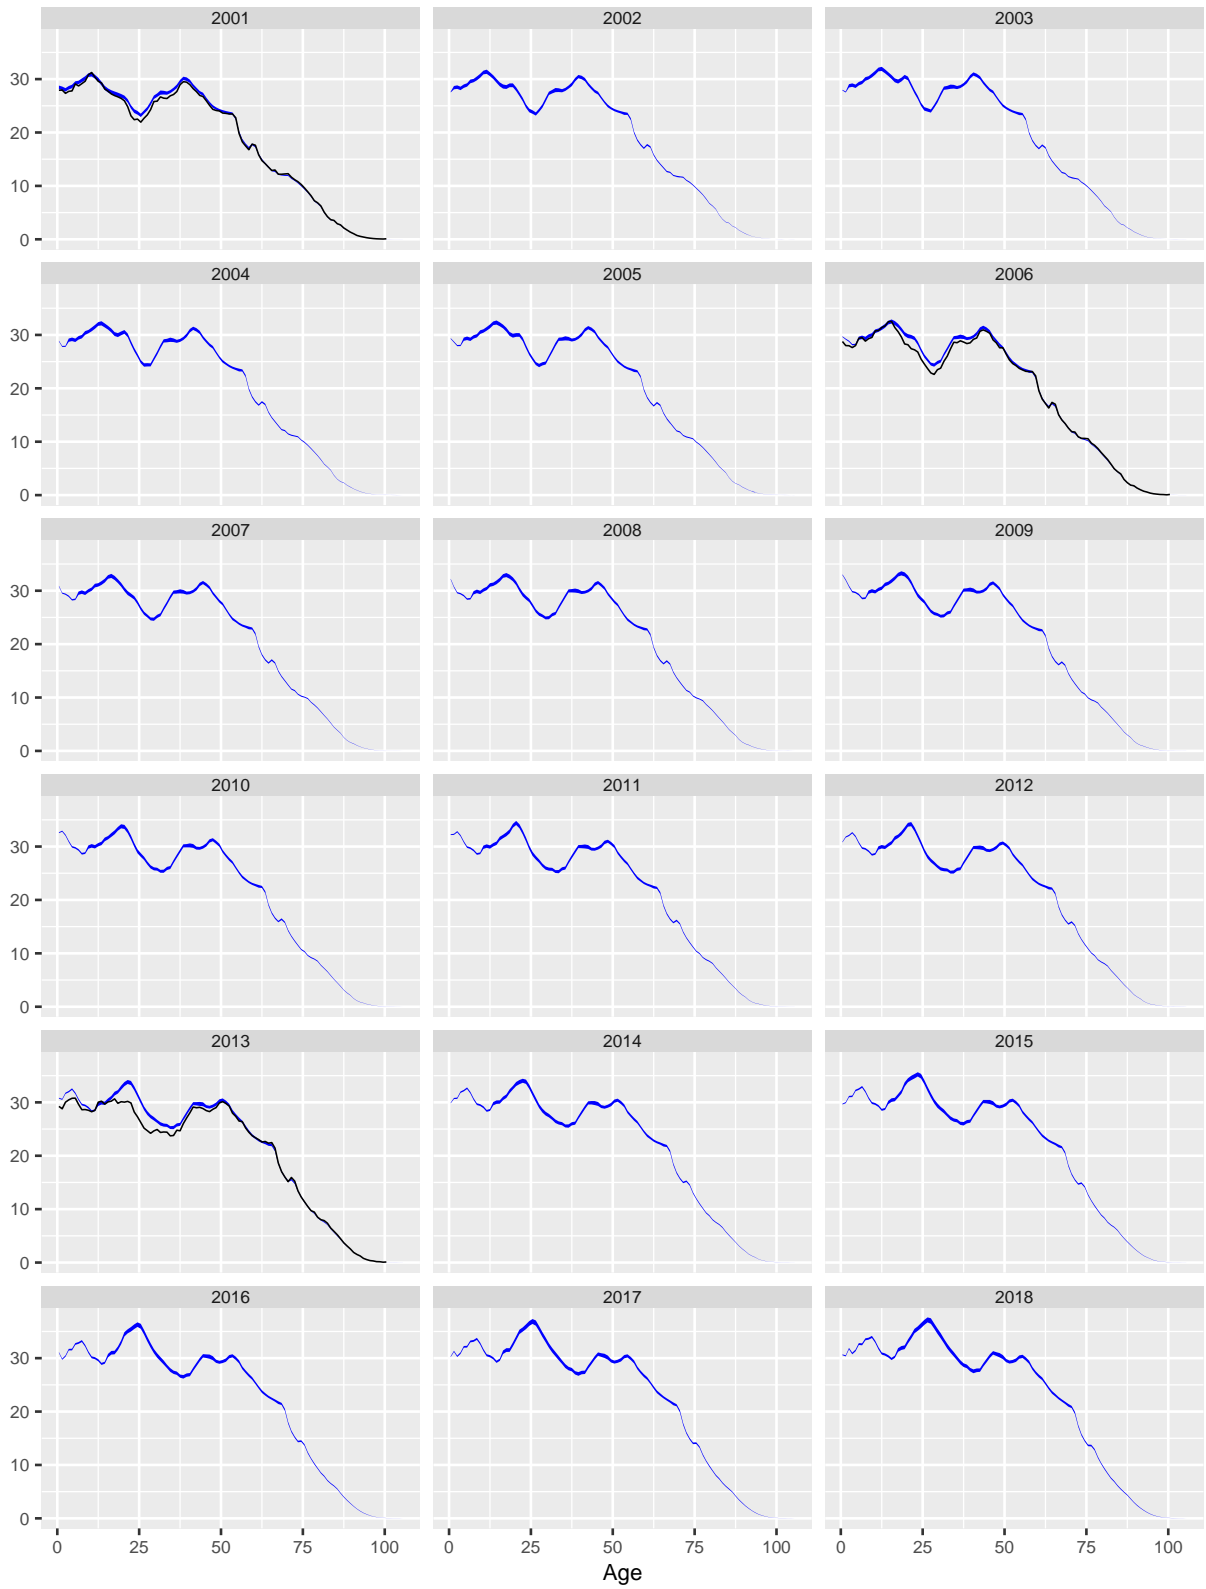

Figure 8: Population - male. Blue bands denote 95% credible intervals. Black lines denote unadjusted census counts.

Figure 9: Width of 95% credible intervals for national population, over time. Dotted lines denote census years.

Figure 10: Width of 95% credible intervals for individual age groups, in two census years

Figure 11: Life expectancy. Light blue bands denote 95% credible intervals, and dark blue bands denote 50% credible intervals.

Figure 12: Total fertility rate. Light blue bands denote 95% credible intervals, and dark blue bands denote 50% credible intervals.

Figure 13: Estimated coverage ratios from censuses. Light blue bands denote 95% credible intervals, and dark blue bands denote 50% credible intervals.
